05 Assembly method

Precautions when assembling

- * Please be careful not to pinch or press your hands when folding.
 - * Because of the risk of injury, be sure to operate with two people when moving or assembling the product.
 - * When clamping the safety clip, please lift your legs slightly, the clip will easily enter after shaking it from side to side.
1. Now clamp the fixing clip at the fixed foot. 2. Clamp at the end of the reverse side.
- * When it is difficult to change the angle, you can slightly loosen the screws connecting the two fixed feet and readjust it.

Installation steps 01

1. Open the packaging, cut the zip ties, and remove the accessories.

2. Check the quantity of accessories.

3. Install the headrest and tighten the knob.

4. As shown in the figure, take two rope adjustment devices and pulley rods, thread the rope through the rope adjustment device, and then tie the knot.

5. Install 2 rope pulling devices and 4 M8*16 bolts, and tighten them with a small hex wrench.

6. Pull out the folding pins on both sides of the top fold.

7. As shown in the picture, lift the folding armrest and unfold the frame. (Note that two people can also collaborate to develop the framework)

8. Insert the two folding pins into the middle hole to lock the frame.

Installation steps 02

9. Take the pulley rod and unscrew the adjustable device knob to pull it out outward.

10. Insert the pulley rod and release the adjustable screw to lock the gear.

11. As shown in Figures 9 and 10, install the pulley rod on the other side.

12. Pull out the support pins on both sides of the rear tripod.

13. Pull out the two support pins of the front tripod.

14. Lift the frame and unfold the front stand, ensuring that the front stand is fully unfolded.

15. Insert the two support pins into the front tripod holes and lock them.

16. Unfold the rear tripod, insert the two support pins into the holes of the rear tripod and lock them.

Installation steps 03

17. Pull and lift both side handrails.

18. Adjust the handrail to the middle gear.

19. Take the handrail rod,remove the screws and gaskets for two sides with hexagon wrench.

20. Place the handrail rod in the two head slots of the handrail.

21. Tighten the for two sides gaskets and with an hexagon wrench.

22. Lift the foot pillow.

23. As shown in the figure, remove the latex tube.

24. After removing all latex tubes, push the seat cushion away.

Installation steps 04

25. Take a stop block and M8*30 bolt, insert them into the hole.

26. Use a hex wrench to tighten the bolt.

27. Use a hex wrench to install the other stop block.

28. Insert the latex tube into the slot.

29. It can adjust the number of fixed device roots and control the strength when using.

30. Put back the foot pillow.

31. Insert the foot post into the hole and tighten it.

32. Insert the foot post into the hole on the other side and tighten it.

Installation steps 05

33. Take the roller and M8*16 bolt/washer, and tighten them with a hex wrench.

34. Follow the steps in Figure 33 to install the roller on the other side.

35. Install two shoulder pad as shown in the picture.

36. Place the foot pad at the bottom of the front and rear footrests.

37. Adjust the armrest rod to the position shown in the picture.

38. Insert the springboard into the slot.

(Note: The position of the armrest is very important. Please confirm that it has been adjusted to the correct position before using the jump board!)

Step of folding 01

1. Adjust the armrest tube to the position shown in the picture.

2. Pull out the support pins on both sides of the front stand.

3. Pull out the support pins on both sides of the rear tripod.

4. Lift the frame, fold the tripod, insert the support pin to lock it.

5. Fold the front tripod and insert the support pin to lock it.

6. Pull out the adjustable knob and take out the pulley rods on both sides.

7. Pull out the folding pins connecting the two sides in the middle of the frame.

8. Grasp the folding armrest below the panel and lift it upwards.

Step of folding 02

9. Insert two support pins into the side holes on both sides to lock the steel frame.

10. Place the pulley rod and shoulder into the storage hole.

11. Folding completed.

NOTE WHEN USING AGAIN

1. Take out the two pulley rods and the shoulder pads.

2. Pull out the two side latches and unfold the frame.
